LINE 6A00

Stainless steel distribution manifolds

DESCRIPTION

THOR (6A00 SERIES) manifolds with 3/4" Eurocone outlets are the ideal solution for the distribution of water in radiant heating and cooling systems.

These manifolds are pre-assembled on brackets and are available with 1" delivery and return flow rods. They can be housed in metal cases and placed within partition walls.

A wide range of accessories makes it possible to complete the manifold with all the necessary components for the proper functioning of the system: shut-off ball valves, venting valves, bypass valves and input/output taps.

ADVANTAGES

- Balancing of each loop
- No unnecessary waste
- High technical comfort
- Suitable both for high and low temperature installations
- Mechanical resistance
- High lightness
- No tension corrosion
- No electrolytic corrosion
- High flow rate

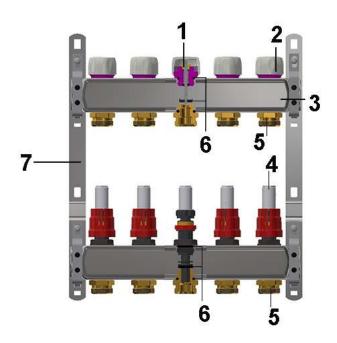

FIELDS OF APPLICATION

| APPLICAT | TONS | T.min. with control stem | T.min. with flow meter | T.max with control stem | T.max with flow meter | Press. max with mechani cal screw | Press. max with flow meter | Flow rate with flow meter |
|----------|---|-----------------------------------|------------------------------|----------------------------------|-----------------------------|--|-------------------------------------|---------------------------------|
| | floor heating | -20°C | -7°C | +95°C | +65°C | 10 bar | 6 bar | 0.5 lt/min |
| | low temperatur e heating (wall) | -20°C | -7°C | +95°C | +65°C | 10 bar | 6 bar | 0.5 lt/min |
| | low temperatur e heating (ceiling) | -20°C | -7°C | +95°C | +65°C | 10 bar | 6 bar | 0.5 lt/min |
| | radiators | -20°C | -7°C | +95°C | +65°C | 10 bar | 6 bar | 0.5 lt/min |
| | cooling | -20°C | -7°C | +95°C | +65°C | 10 bar | 6 bar | 0.5 lt/min |
| | -20°C: only with antifreeze liquid (glycol) in % max of 30% | | | | | | | |

REGULATIONS

• UNI EN ISO 228-1:2003

Threads complies with UNI EN ISO 228-1:2003 law: "Piping thread for coupling not with thightness on the thread"

FLOWMETER "MEMORY - STOP" FUNCTION

Memory stop function.

Blocking system of the opening grade of the flowmeter which allows, once the system is reopened, the stopping of the run at its initial setting (project value).

| LEGEND | COMPONENTS |
|--------|--------------------|
| 1 | Regulation ring |
| 2 | Memory stop ring |
| 3 | Glass hexagon part |
| 4 | Glass |
| 5 | Control |

- 1) Set the Flowmeter control to the design value. The control wheel must be removed during this operation.
- 2) Turn the "Memory stop" ferrule anticlockwise (left-hand thread) to the end of its travel.
- 3) Put the control wheel back on. The individual circuit can be closed by turning the wheel clockwise. By turning it the other way up to the stop it is possible to reopen the circuit to the set design value. Using the two holes in the control wheel it is possible to seal the Flowmeter so as to prevent tampering with the setting.

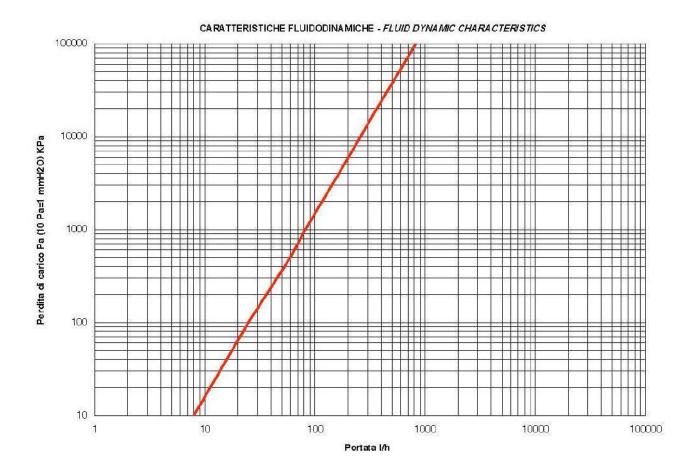

Warning: do NOT use any tools to turn/manipulate the Flowmeter, as to do so could stop it working properly.

| FLOWMETER 0.5 L | | |
|-----------------|--------|-------|

| 100000 | 100 | 825 |

FLUID DYNAMIC CHARACTERISTICS

MAINTENANCE INSTRUCTIONS

The glass can be disassembled in order to check its cleanliness, even when the installation is working.

- 1) Close the flow meter turning the ring, but not before than having recorded the installation balancing (I/min)
- 2) With the help of a hexagonal wrench, unscrew the glass by acting on the hexagonal structure of the glass
- 3) Clean the glass
- 4) Re-insert the glass in its original position, balancing again the installation

MECHANICAL BALANCING OF THE INSTALLATION

Flow measuring devices (flow meters) are located on the delivery circuit, making it possible to establish the theoretical flow value of the hydraulic system through the adjustment of the meters/regulators, which will be carried out by the installation technician.

You have to adjust it when the valve is in the back-draft position and completely open.

Given that the flow of each plumbing circuit causes a loose in installation capacity, for each ring of the flow meter is basic that the adjustment are made by hand until you reach flow value in litre/minutes decided by the plan.

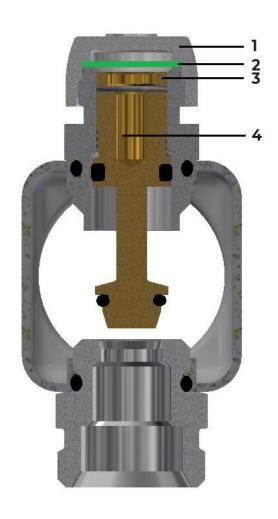

LOCKSHIELDS (mechanical memory stem)

Calibration instructions for manifolds with lockshields:

- Unscrew the cap
- Using a hex key, tighten the cut-off valve until it's completely closed
- The lockshield is ready to be adjusted as per the chart below
- Use the closing ring to create a mechanical stop, tightening it down to the cut-off valve once the desired flow has been set. By so doing, the cut-off valve can be opened and closed without altering the set calibration.

| LEGEND | COMPONENTS |
|--------|---------------|
| 1 | Сар |
| 2 | Gasket |
| 3 | Closing ring |
| 4 | Cut off valve |

| Posizione /Position | N° giri / turns | Kvs (m3/h) |

| 10 | 5 | 1.76 |
| 11 | 5+1/2 | 1.85 |
| 12 | completely open | 1.92 |

PROTECTING HYDRAULIC BALANCING FROM TAMPERING

Adjustment of the flow regulators and meters can be blocked by a protective cover, sealed if necessary.

Pre-set shut-off valves for electrothermal command

- 1. Unscrew the protection handle
- 2. Place the electrothermal head on the valve
- 3. Tighten the metal closing ring by hand (threading: M30x1.5)
- 4. Complete the electrical connections

COMPONENTS:6A00.55

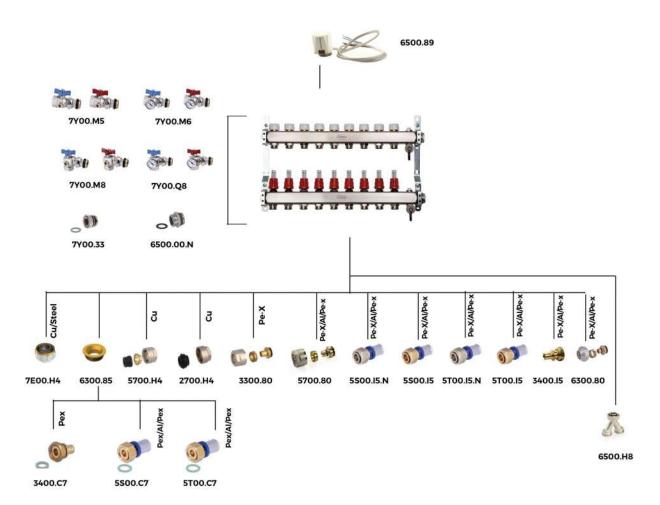

Manifold composed of:

- -Delivery manifold complete with flow meters and nipples with 3/4" Eurocone connectors
- Return manifold complete with shut-off valves arranged for electrothermal control and 3/4" eurocone niples
- Brackets
- Manual vent valve, fill/drain tap and cap

COMPONENTS 6A00.93

Manifold composed of:

- Delivery manifold complete with mechanical memory stems
- -Return manifold complete with pre-arranged shut-off valves for electrothermal command
- -3/4" Eurocone adapters
- Brackets

 $^{^{\}star}$ standard bracket already assembled (H89) for use with 110 depth case (AC0080I500000A / AC0080I700000A / AC0080I100000A)

^{**}Optional bracket, not present in the package (H76), for use with 90 depth case (AC0080I550090A / AC0080I700090A / AC0080I850090A /AC0080I100090A) and 110 depth case (AC0080I500000A / AC0080I700000A / AC0080I100000A)

^{***}standard/optional bracket
