MULTILAYER PIPE SYSTEMS

EVOLVED DNA

Multi-profile press fittings with galvanic treatment and Leak Before Press system

- + "Steel like tin" galvanic treatment: stable at ordinary high temperatures; reduces limescale deposits, protects against lead release, ensures high water potability, resists corrosion and wear, cancels dezincification, guarantees the permanence of lucidity over time
- + LEAK BEFORE PRESS function: if the fitting is not properly pressed, leaks are immediately noticed when the water circulates in the system
- + Multitool: TH, H, U
- + Dielectric ring with window for checking the correct position of the pipe
- + Colored ring for immediate identification of the diameter and thickness of the pipe
- + Available up to Ø63, including Ø16x2.25 and Ø20x2.50

SAFE_PRESS

Multi-profile press fittings with Leak Before Press system

- + LEAK BEFORE PRESS function: if the fitting is not properly pressed, leaks are immediately noticed when the water circulates in the system
