ed. 02/2020

## ✓ Performances

Min. working temperature	-20 °C
Max. working temperature	+ 95°C
Working pressure	10 bar

## ⚙ Applications

- Distribution of hot and cold water in sanitary installations
- Radiator heating systems
- Radiant panel heating systems
- Radiant panel cooling systems
- Compressed air systems
- Plants for the transport of chemicals or petroleum products (after verification by the technical office of General fittings Spa)

## ☰ Features

### • Pipes

Tests (according to European standard) confirm that 3400 fittings can be used both with Pe-X pipe and Pe-X Al Pe-X pipe. Our Pe-Xa pipe has the following features:

- High flexibility, allowing excellent resistance to kinking
- EVOH barrier
- Resistance to many chemical products
- Material resistant to the propagation of cracks
- UV radiation resistance, thanks to the stabilizer mixed to the material of Pe-X tube
- Pipe resistance to temperatures from -30°C to +100 °C

### • Sleeve's ductility

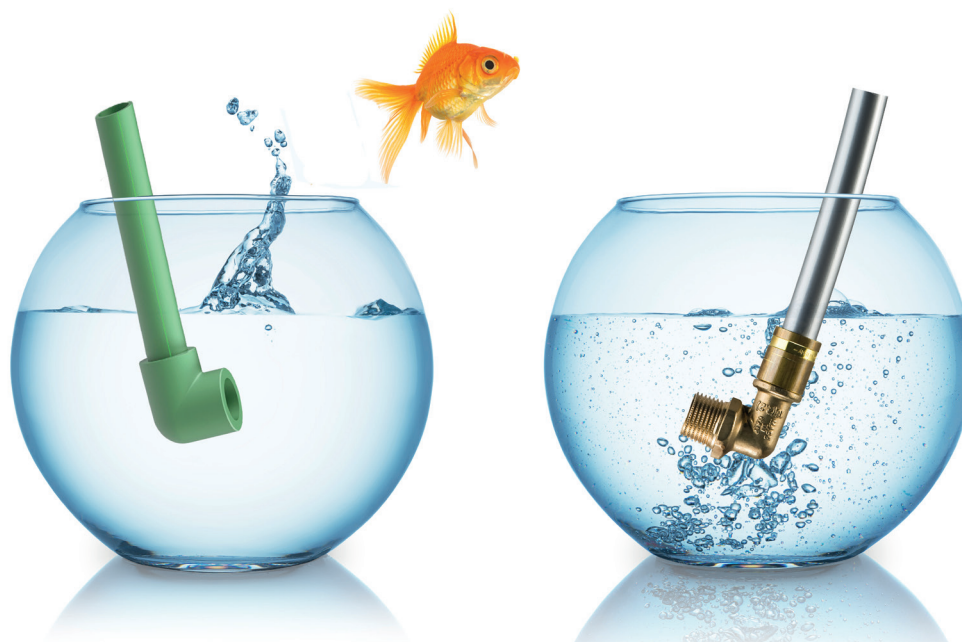

Heat treatment guarantees ductility, and inhibits toughness.

*Heat treatment =  
ductility =  
less chances of breaking*

### • Certifications

Among the certifications obtained from the **Gold-Fix** 3400 range stand out the certification issued by KIWA CERMET ITALIA to attest the 100% Italian production, the GOST certificate (Russia) and the Kiwa KOMO one.
